IN THE THEATRES

JACKSON'S

Lole Fuller.

To put dancing on a basis with the arts has been the notable endeavor of some half a dozen artists of the last few years, but it is probable that none of them have done more to popularize classic dancing than Lole Fuller, who, at the head of a cast of 35 persons, appears at Jackson's theatre, this evening. There are besides Miss Fuller and her mimes, two solo dancers who had not been taught under her instructions. These are Gertrude Von Axen and Irene Sanden. They are celebrated European creators of their own art, each different in itself, and have been engaged especially for Miss Fuller's American tour. The programme consists of a series of solo dances, interpreting with bodily motion the music of Mendelssohn, Beethoven, Durand, Tannhauser, Mozart, Chopin, Rubinstein, Brahms, Schubert and Strauss, and at the end of the ballet of light, given by Miss Fuller, and her mimes, Miss Von Axen is noteworthy in her first and last productions. Her is of the Teuton type and her interpretation of Beethoven's funeral march is impressive in its restrained mental agony, its hopeless woe. In her last dance, a march from Schubert, she gives a totally victorious march, vigorous and buoyant. Miss Irene Sanden is a quite different type of dancer. She is extremely light, airy, abandoned, and her most pleasing role is in happy, carefree music. Her delicate, imaginative conception of one of the Strauss values is a wonderful bit of visualization, and her Bachman of Rubinstein is the mad dance of a spirit drunk with youth. Orchids, the first music, gives two solo dances which are pleasing. There is a march by Mozart and a pantomime dance with all the mimes portraying the dancing huts, Diana. The biggest and most spectacular dance is that of Lole Fuller and the mimes in the ballet of light.

Sheedy and Jackson's Vaudeville.

One of the most sensational feature acts in vaudeville is the excellent bill, which Manager Jackson offers for the last two days of this week. Dr. Volta, known as the man who has turned electricity into the only person in the world who has ever defied the famous electric chair at Sing Sing prison, comes to this city after a wonderfully successful engagement at the New York Theatre, New York. Volta submits to having from 10,000 to 50,000 volts of electricity, enough to kill 100 men, passed through his body. While charged with this high current, he performs a number of startling electrical demonstrations in an amazing manner. These demonstrations are accompanied by a highly amusing line of comedy. A handsome scenic equipment, together with a wealth of electrical embellishments adds greatly to the beauty of the act. Another pleasing act is that of Hawley and Oloft, entertainers of superior ability, in a new and immensely pleasing comedy playlet, entitled "Just Married a Wee." This sketch abounds in new, wholesome and refreshing comedy and is capably acted. Sam Barton, the comedy unicyclist introduces an original and pleasing brand of comedy in his unusually clever turn. A colored team are at all times entertaining, and Henderson and Thomas in a neat singing and dancing comedy skit, are no exception to this rule. A series of interesting and instructive moving picture entirely new to local audiences, will be a feature of the bill.

Col. Timothy J. Sullivan presided over the social session of Division No. 2, A. O. H., which entertained State President Philip J. Sullivan of Thompsonville last night. The state president acted as installing officer of the new officers of the division assisted by County President Thomas P. Speers.

STATE PRESIDENT SULLIVAN

GUEST DIV. NO. 2, A. O. H.

The new officers are: President, James H. Rooney; vice president, John R. Murray; recording secretary, Daniel J. Condon; financial secretary, John J. McCarthy; treasurer, Col. T. J. Murphy; chairman of standing committee, John H. McMurray; sergeant-at-arms, John H. Molloy; sentinels, John McCarthy. There were remarks by State President Sullivan, County President Speers, James McLaughlin, Joseph Kelly, William Clifford, John H. McMurray, John J. McCarthy, James H. Rooney, James Phalen, Michael J. Maloney, Frederick C. Mullins, F. P. Devine and others.

RAILROAD EMPLOYEE

DIES FROM A FALL

Putnam, Jan. 13.—While pushing a car on a trestle of the railroad here yesterday, Louis Beraut, an employee of the New Haven road, fell through a coal chute to the ground 90 feet below, receiving injuries to his spine, which caused his death last night. Beraut was 59 years old and leaves a wife and one daughter.

WHITE SLAVE BILL PASSED

HOUSE ADOPTS BENNET-SABATH MEASURE, PROVIDING HEAVY PENALTIES, BY VIVA VOCE VOTE.

Washington, Jan. 13.—By a viva voce vote the House has passed the Bennett-Sabath "white slave" bill.

The "white slave" bill is the result of an investigation of traffic in alien women, made by the National Immigration commission. Provision is made for the deportation and exclusion of immoral aliens and for the exclusion and punishment of their procurers. Traffic in immoral women becomes subject to the restrictions of interstate commerce laws.

Immigration laws are amended so as to exclude persons who are supported by or who receive proceeds from the traffic in aliens, and provision is made for the criminal prosecution of persons who shall harbor aliens for immoral purposes. Any alien inmate of a disorderly house, and any alien who in any way assists such an inmate, are made liable to deportation at any time after their entry into the United States.

The measure makes it a crime punishable by a fine of not more than \$5,000, imprisonment of not more than ten years for any person to procure a ticket for any person to go from one state to another to engage in prostitution.

The latter provision aroused vigorous protests from many members of the House, on the ground that it was unconstitutional, in that it was an infringement on the police powers of the states.

Advocates of the bill contended that such traffic between the states was clearly one of interstate commerce and hence subject to federal regulation.

Railroad President Gives Serious Warning

Boston, Jan. 13.—"We must increase production per acre by more intelligent methods or we must face the relentless certainty that when he shall not produce food enough to supply our own necessities," said President William C. Brown of the New York Central railroad in an address last night before the New England Railroad Club. The wages of labor, he declared, must continue to advance in fair ratio with the steady increase in the cost of living.

Many representatives of New England railroad interests were gathered about the banquet tables at Hotel Somerset. In addition to President Brown, Governor Eben S. Dyer, was also a principal guest and speaker.

President Brown's speech coming as it does at the height of a new flood tide of national prosperity, was intended as a warning of the most serious import. It gains added force by its reiteration of the recent admonitions of James J. Hill, another great railroad man, who said that the employees of all the railroads east of the Mississippi are formulating demands for an increase in wages, based on the increased cost of living.

EAGLES' ENTERTAIN LADIES WHO AIDED THEM AT CARNIVAL

The members of the fair sex who aided Bridgeport Aerie of Eagles so munificently at a recent carnival were guests at a banquet last night given in their honor by the members of the organization. It was just a slight expression of the kindly feeling of the aerie members for the young women who had helped the order. The banquet was served by Eddie Madigan and the menu was one of the finest. The toastmaster was President George P. Jamieson, who complimented the guests of the evening for the work they had performed for the order. Other speakers were Chairman P. H. Brady of the carnival committee, Mayor Buckingham, City Clerk Stephen P. Boucher, Worthy Vice President William Callan, and East President Henry E. Shannon.

During the evening the gathering was entertained by Miss Ruth Ketchum, Miss McNamara, Andy Rice and Finnigan and Edwards of the Polk vaudeville bill, and Ben Linn who is appearing at Jackson's. Dancing was enjoyed until a late hour by the 400 who were present.

Robs Yale Students

While They Dine

New Haven, Jan. 13.—While Yale men were at dinner yesterday the most extensive jewel robbery in years occurred. Connecticut, Welch and Lawrence Halls being ransacked by a thief.

Sidney McCall, who rooms in Connecticut Hall, lost a diamond stick pin, a gold watch, and other jewelry valued at \$200. In Lawrence Hall given by a Frenchman, a diamond ring worth \$15 and several railroad tickets. Messrs. Patrick Healey and James McKnight lost gold cuff buttons and stick pins.

Francis M. Knight, a sophomore living in Welch Hall was in his room in the dark when a young man entered and on seeing Knight left after exclaiming himself.

NEWEST NOTES OF SCIENCE

More than 150 persons either were killed outright or injured in accidents while climbing the Alps last season.

In the investigation of ocean movements around New Foundland it has been found that icebergs are unaffected by the currents of the sea.

A putty knife with a reservoir in the handle from which putty can be squeezed by pressing a button, has been invented as a time saver for glaziers by a Minnesota man.

An amphibious automobile, shaped like a boat and driven by propeller when in the water, has been purchased by the French War Department and assigned to an engineer regiment.

The Department of Agriculture is experimenting with some varieties of corn from China which seem well adapted to the hot and dry conditions of certain portions of the Southwest.

Russian explorers have found in Turkistan the ruins of a subterranean city built by a highly civilized people before the Christian era, entrance to which was effected by caves.

The Italian Parliament will authorize the expenditure of \$1,600 a year for the enrolling and deciphering of the nearly 3,000 papyri found in Herculaneum and stored in the Naples library.

Scientists would like to learn the secret of the firefly's illumination, which is the only known light utilizing 100 per cent of the energy used for its production, none of it being wasted.

A French scientist has advanced the theory that there is no such metal as Radium, but that radio-activity is the result of certain now unknown chemical combinations of which barium forms the chief part.

The proclaimed boundaries of the national forests now include nearly 155,000,000 acres of land within which have been alienated by Congressional grants and the patenting of claims.

The British Admiralty is trying out a torpedo which is said to pick up sounds by microphones, so connected by delicate mechanism to its rudders that the torpedo is automatically directed to the source of the sounds.

A stocking that is intended to outwear many of the ordinary sort, the invention of a Mississippi woman, has a transversely ribbed gore at the knee of heavier material and more closely woven than the rest of the stocking.

In a new refrigerator recently patented by a Georgian the usual shelves are replaced by drawers hinged at one corner to swing outward but a limited distance, the bottoms of the drawers being perforated for ventilation.

Sixty chalets, similar to those used in the Alps, have been sent to Messina and Reggio by the Swiss Red Cross Society, which believes such buildings will withstand earthquake shocks better than the usual Italian structures.

Boston, in the interest of health and economy, is being provided with odorless steel tank garbage wagons, so arranged that the lids are automatically lifted when a person steps on the running board to empty a receptacle into them.

The Geological Survey has issued a primer for the use of those who have to do with explosives, telling in untechnical language how and of what explosives are made, pointing out the dangers and showing how these may be reduced to a minimum.

An English syndicate is excavating at the pool of Salomo near Jerusalem in the hope of finding the Ark of the Covenant, Aaron's rod and other treasures of King Solomon's Temple, believed by some archeologists to be buried in the vicinity.

Many of the pupils of the public schools of Cuba are learning English by studying the illustrated catalogues of American business houses.

German artillerymen have proved that they can destroy dirigible balloons, flying at a greater height, with their new guns, built for the purpose.

A cent's worth of electricity, at the average price in this country, will raise ten tons 12 feet high with a crane in less than a minute.

LET THE EVENING FARMER

DO THINGS FOR YOU.

When this newspaper has given to you the last word about the events of the day—when it has acted as a sort of Central Office in "connecting" you with "all of Creation"—it has done much for you, of course.

But it can do more than that. It can help you run your store, your office, your factory or your house.

It can carry your "little worries" for you—and never turn a hair. You do not fully use your newspaper if you simply read it. You don't really KNOW your newspaper until you have used its want advertising columns. It can dispose of things for you—it can secure things for you.

It can find lost things for you, find any kind of help you need, find buyers for your house, your lot, your horse, your furniture, your shop or store, leasehold or interest or equity. In short, any day, every day, this newspaper stands ready and able to DO THINGS FOR YOU!
